1. Properties of Fluids

1-49

1.1 Introduction	1
1.2 Solid and Fluid	2
1.2.1 Solid	2
1.2.2 Fluid	2
1.3 Standard Temperature and Pressure (STP) and Normal Temperature and Pressure (NTP)	2
1.4 Mechanics of Fluids	2
1.5 Properties of Fluids	4
1.6 Density	4
1.7 Specific Volume	4
1.8 Specific Weight	5
1.9 Specific Gravity	5
1.9.1 Specific Gravity for Liquids	5
1.9.2 Specific Gravity for Gases	6
1.10 Adhesion	6
1.11 Cohesion	7
1.12 Viscosity	7
1.12.1 Kinematic Viscosity	8
1.12.2 Effect of Temperature on Viscosity	9
1.12.3 Effect of Pressure on Viscosity	10
1.12.4 Types of Fluids	
1.13 Vapour Pressure	11
1.13.1 Evaporisation and Boiling	12
1.13.2 Cavitation	13
1.14 Surface Tension	14
1.14.1 Surface Tension on Liquid Droplet	15
1.14.2 Surface Tension on a Hollow Bubble	16
1.14.3 Surface Tension on a Liquid Jet	16

1.15	Capillarity	17
1.16	Compressibility	20
	<i>Summary</i>	42
	<i>Assignment - 1</i>	46
	<i>Assignment - 2</i>	48

2. Pressure and Its Measurement

51–96

2.1	Pressure and its Units	51
2.2	Pressure Head	52
2.3	Laws of Liquid Pressure, Hydrostatic Equation and its Application	53
2.3.1	Laws of Liquid Pressure	53
2.3.2	Hydrostatic Equation	54
2.3.3	Application	54
2.4	Pascal's Law	54
2.5	Atmospheric Pressure and its Measurement	55
2.5.1	Measuring Atmospheric Pressure	55
2.5.2	Aneroid Barometer	56
2.6	Absolute, Gauge and Vacuum Pressure	62
2.6.1	Absolute Pressure	62
2.6.2	Gauge Pressure	64
2.6.3	Vacuum Pressure	64
2.7	Measurement of Pressure	67
2.7.1	Simple Manometers	67
2.7.2	Differential Manometers	78
2.8	Mechanical Gauges	86
2.8.1	Diaphragm Pressure Gauge	86
2.8.2	Bourdon Tube Pressure Gauge	86
2.8.3	Dead-weight Pressure Gauge	88
2.8.4	Bellows Pressure Gauge	89
2.9	Pressure Transducer	89
	<i>Summary</i>	91
	<i>Assignment - 1</i>	94
	<i>Assignment - 2</i>	95

3. Hydrostatic Forces on Surface

97–158

3.1	Introduction	97
3.2	Total Pressure and Centre of Pressure	97
3.2.1	Total Pressure (F)	97
3.2.2	Centre of Pressure (CP)	97
3.3	Hydrostatic Pressure	97
3.3.1	Hydrostatic Law	98
3.4	Total Pressure (F) and Centre of Pressure (CP) for Submerged Surfaces	98
3.4.1	Vertical Plane Surface Submerged in Liquid	98
3.4.2	Horizontal Plane Surface Submerged in Liquid	102
3.4.3	Inclined Plane Surface Submerged in Liquid	102
3.4.4	Curved Surface Submerged in Liquid	124
3.5	Total Pressure and Centre of Pressure on Lock Gates	135

3.6 Pressure Distribution in a Liquid Mass Subjected to Uniform Acceleration	140
3.6.1 Liquid Mass in a Container Subjected to Constant Acceleration in the Horizontal Direction	141
3.6.2 Liquid Mass in a Container Subjected to Uniform Acceleration in the Vertical Direction	144
Summary	152
Assignment - 1	156
Assignment - 2	158

4. Buoyancy and Floatation 159–195

4.1 Introduction	159
4.2 Buoyancy or Buoyant Force	159
4.3 Centre of Buoyancy	161
4.4 Principle of Floatation (Archimedes' principle)	161
4.5 Metacentre and Metacentric Height	167
4.6 Equilibrium of Floating Bodies	168
4.7 Equilibrium of Submerged body	169
4.8 Determination of Metacentric Height	170
4.8.1 Analytical Method of Determination of Metacentric Height (GM)	170
4.8.2 Experimental Method of Determination of Metacentric Height (GM)	172
Summary	190
Assignment - 1	192
Assignment - 2	192

5. Kinematics of Fluid Motion 197–286

5.1 Introduction	197
5.2 Methods of Describing Fluid Motion	197
5.2.1 Lagrangian Method	197
5.2.2 Eulerian Method	197
5.3 Types of Flow Lines	198
5.4 Stream Tube	200
5.5 Types of Fluid Flow	201
5.5.1 Steady and Unsteady Flow	201
5.5.2 Uniform and Non-uniform Flow	201
5.5.3 Laminar and Turbulent Flow Reynolds Number (Re)	202
5.5.4 Compressible and Incompressible Flow	204
5.5.5 Rotational and Irrotational Flow	206
5.5.6 One, Two and Three-dimensional Flows	206
5.6 Rate of Flow	207
5.7 Continuity Equation	208
5.8 Continuity Equation in Three-Dimensions in Cartesian Coordinates (x, y, z)	213
5.9 Continuity Equation: Integral Form	215
5.10 Continuity Equation in Cylindrical Coordinates (r, θ, z)	216
5.11 Velocity and Acceleration	219
5.12 Stream Function (ψ)	225
5.13 Velocity Potential (ϕ)	227

5.14	Types of Motion or Deformation of Fluid Elements	241
5.14.1	Pure (or linear) Translation	241
5.14.2	Linear Deformation	241
5.14.3	Angular (or shear) Deformation	241
5.14.4	Pure Rotation	242
5.15	Vorticity	244
5.16	Vortex Flow or Whirling Flow	248
5.16.1	Forced Vortex Flow	248
5.16.2	Free Vortex Flow	249
5.17	Stream Line	261
5.17.1	Equipotential Line	261
5.18	Flow Net	262
5.19	Uses of Flow Net	263
5.20	Methods of Drawing the Flow Net	263
5.20.1	Analytical (or Mathematical) Method	263
5.20.2	Graphical Method	263
5.21	Source and Sink Flows	263
5.21.1	Source Flow	265
5.21.2	Sink Flow	269
5.22	Circulation	269
5.23	Doublet	270
5.24	Half-body— Source in a Uniform Stream	274
	<i>Summary</i>	277
	<i>Assignment - 1</i>	283
	<i>Assignment - 2</i>	285

6. Dynamics of Fluid Flow

287–360

6.1	Introduction	287
6.2	Types of Forces Influencing Motion	287
6.3	Equations of Motion	288
6.4	System	289
6.5	Types of System	289
6.5.1	Control Mass System	289
6.5.2	Control Volume System	290
6.5.3	Isolated System	290
6.6	Reynolds Transport Theorem (RTT)	291
6.7	Euler's Equation of Motion	294
6.8	Bernoulli's Equation	295
6.9	Limitations of Bernoulli's Theorem	298
6.10	Graphical Representation of Bernoulli's Equation	314
6.11	Practical Application of Bernoulli's Equation	316
6.12	Impulse Momentum Equation	317
6.12.1	Application of Momentum Equation or Momentum Principle	318
6.13	Force Exerted by a Flowing Fluid on a Pipe-bend	318
6.14	Summary	320
6.15	Fluid Jet or Jet	339

6.16	Impact of Jet	339
6.17	Force Exerted by the Jet on a Stationary Flat Plate	339
6.17.1	Plate is Vertical to the Jet	339
6.17.2	Plate is Inclined to the Jet	340
6.17.3	Plate is Curved	342
6.18	Force Exerted by the Jet on a Hinged Plate	350
	Summary	356
	Assignment - 1	359
	Assignment - 2	360

7. Dimensional and Model Analysis **361–434**

7.1	Introduction	361
7.2	Primary (or Basic or Fundamental) Quantities And Secondary (or Derived) Quantities	362
7.3	Dimensional Homogeneity	365
7.4	Method Used for Dimensional Analysis	367
7.4.1	Rayleigh’s Method	368
7.4.2	Buckingham’s π -Theorem	374
7.5	Method of Selecting Repeating Variables	376
7.6	Procedure for Solving Problem by Buckingham’s Pi-Theorem	376
7.7	Model Analysis	385
7.8	Similitude	387
7.8.1	Geometric Similarity	387
7.8.2	Kinematic Similarity	387
7.8.3	Dynamic Similarity	388
7.9	Types of Forces Acting in Moving Fluid	389
7.9.1	Inertia Force (F_i)	389
7.9.2	Viscous Force (F_v)	389
7.9.3	Gravity Force (F_g)	389
7.9.4	Pressure Force (F_p)	389
7.9.5	Surface Tension Force (F_t)	410
7.9.6	Elastic Force (F_e)	410
7.10	Dimensionless Numbers	410
7.10.1	Reynolds Number (Re)	410
7.10.2	Froude’s Number (F_r)	411
7.10.3	Euler’s Number (Eu)	411
7.10.4	Weber’s Number (We)	412
7.10.5	Mach’s Number (M)	412
7.11	Model Laws or Similarity Laws	413
7.11.1	Reynolds Law	413
7.11.2	Froude’s Law	414
7.12.3	Euler’s Law	418
7.12.4	Weber’s Law	418
7.12.5	Mach’s Law	419
7.12	Types of Models	426
7.12.1	Undistorted models	426

7.12.2 Distorted models	427
Summary	429
Assignment - 1	433
Assignment - 2	434
References	435
Appendices	437
Index	445
